Visual Standards

Finish First

ORANGE PEEL STANDARDS

ACT manufactures sets of panels with graduated degrees of orange peel (flow) from rough to smooth. Thousands of customers use these panels to visually evaluate the appearance of painted parts using a consistent, known standard. Each set consists of ten 4x6 inch panels which are painted black and labeled with their corresponding flow rating (orange peel) from 1 to 10. *THESE PANELS ARE VISUAL STANDARDS ONLY.*

ACT ORANGE PEEL STANDARDS - ITEM 14941

These panels are reproduced from the same master set as the automotive grade standards; however, no numerical readings or independent (third party) review is performed. This set is useful as internal standards where no comparison must be made with a particular automotive manufacturer's certified standards.

CHRYSLER ORANGE PEEL STANDARDS - ITEM 16625

These panels have been approved by Chrysler for use by their suppliers in evaluating the appearance of painted parts.

FORD ORANGE PEEL STANDARDS - ITEM 16125

These panels have been approved by Ford Motor Company for use by their suppliers in evaluating the appearance of painted parts.

GM ORANGE PEEL STANDARDS - ITEM 34134

These panels have been approved by General Motors for use by their suppliers in evaluating the appearance of painted parts.

POWDER SMOOTHNESS STANDARDS

ACT Test Panels manufactures sets of panels with graduated degrees of powder smoothness from rough to smooth. Thousands of customers use these panels to visually evaluate the appearance of powder coated parts using a consistent, known standard. Each set consists of ten 4x6 inch black panels which are labeled with their corresponding smoothness rating from 1 to 10. *THESE PANELS ARE VISUAL STANDARDS ONLY.*

POWDER SMOOTHNESS STANDARDS - ITEM 22163

Developed by 'The Powder Coating Institute' and produced by ACT, these panels represent the degrees of smoothness achievable with powder coatings and are considered the benchmark for smoothness within the powder coating industry.
